I am a person who loves to solve problems, which prompted me to change my profession and become a programmer. I completed the Full Stack course to gain an in-depth understanding of the principles of both sides of programming front-end and back-end. I gained my experience by working on my own projects, which allowed me to practice and improve my programming skills. I am looking for an opportunity where I could contribute to the success of the company while developing my skills and knowledge. I believe that my skills and experience can bring value to any programming team.
